Ian,

It is beyond my comprehension that even without an event they decide to do this . I specifically offered Mike P the opportunity to test his system during the day between 11-3 when we were turning rooms.

Maureen's statements are again factual inaccurate as yes, I did unplug and remove the unauthorized fog machines which had caused a fire alarm to go off because they were still using them and refused to turn them off. I never had any conversation with police remotely similar to what Maureen describes, but I did speak with officer McGovern (with Nick Kaiser on speaker phone) when Maureen called the NYPD after the locks were changed. I did speak again with NYPD again when they showed up following the Halloween unauthorized event. I did talk with our neighbors across the street to assure them that we would get the noise and headlights/ loitering in front of there residence problems under control, I did speak with senior FDNY with strong contacts with the NYPD community affairs office about the Halloween fire alarm incident, I did speak with Chairperson of the LGBTQI+ Advisory Committee to the Police Commissioner about our efforts to improve neighborhood relations.

It is a huge drain to have continually refute Maureen's desperate inaccurate claims. The facts should speak for themselves. This needs to come to an end it has now reached the point where it threatens the ongoing viability of the Hotel. There is not much time left to rectify this.

Baby,

Why were you testing new equipment to maximum volume with Mike Ps guys @ 1230am last night on a "school night" so to speak. Many hotel customers had to be reimbursed this morning because of the disturbances I was in the lobby at midnight and I felt like I was in the middle of a nightclub in the lobby. The music was at maximum volume. Neighbors across the street were screaming to lower the music when I was in front of the building. What are you doing? Are you purposely trying to destroy the hotel?

We have been dropped from many leading web portals (airbnb and [bookings.com](https://www.booking.com)) because of the bad reviews (noise complaints) and we've gone from being a 3 star on our way to becoming a 4 star and now we've dropped to a star which is a disaster for 2025 ADR. Mike

Customers cannot get quite enjoyment at our hotel
It sickens me that you do these things without coordinating with Jeremy. Please start working hand-in-hand with him when you have events so that he can put customers that are here for nightlife above the nightclub

Why can't you test new equipment during the day???

THUGGERY!! Your goons have physically removed Richard from the club attempted to remove me from the club last night and removed my friend Erik Ternon from the club last night and many others. Please tone it down.

Baby,

I can only give you so many warnings before you invitation to make our "URBAN RESORT" & "Entertainment Complex" a smash hit again will be withdrawn!!!!

Tonight I looked for a master key to the nightclub so I could get in at midnight to meet the SLA inspector and the front desk did not have a key and nobody knew how to get a key and that's in stark violation to my DEMAND a month ago that the front desk have under lock & key a set of keys to MY nightclub. Deliver a set of keys today by 5 PM or you will be escorted off my property.

We have been asking for a month to get back to the master key for the hotel and you have failed to return it and I know you have it and don't deny it!!!!!! You you claimed that Tristan has it and Tristan says you have it and I'm sick of the bullshit. Again you have till 5 PM to return the key or you will be escorted off my property!

It was very scary to have an SLA inspector on the property tonight. I will say that you did a very good job schmoozing him and we avoided disaster!!!! But be warned he's not the only one at SLA watching us and you must must must play by the rules going forward. That means every single rule..., I will leave it to Paul Brown to discuss that with you

I was happy to hear there is no 50 Cent party this weekend and that you confirmed with me three times there will be no parties this weekend!!!!!! You can do zero parties without Paul Brown's permission and if you do any parties you will be escorted off my property.

I will again remind you that any any events or parties in the entertainment complex have to be approved by Paul Brown who will file with SLA which means you gotta give him two weeks notice!!!!

I was very disappointed and shocked to hear that you sold a 7.5% stake in MY "Entertainment Complex" without my knowledge and we will talk about that today. Clearly that 7.5% will come out of your 20% or you can attempt to negotiate that percentage lower with your 2 investors.

Note that you sold equity at a \$2 million evaluation while we hope to get Bennett Lebow's son to buy in at a \$10 to \$12 1/2 million valuation so you did a foolish job selling equity at such a low evaluation! And you did it without my involvement is disgraceful and in violation of your fiduciary responsibility and probably an illegal act.

I look forward to seeing you at 6:30 PM to resolve so many outstanding issues!!
